

## Live Demo ! Smartline. Double - Width, Double Impact 4x1 press

Created from a shared know-how between our customers and our technologists Manugraph proudly presented a live demo of their first Double Width Machine "Smartline" on 21 October '10 at their factory at Kolhapur. Enriched with a combination of innovation and experience, Smartline truly is as unique as our clients' printing needs. To great heights you need to expand. Smartline with a speed of 70000 cph is the right choice.

With the launch of Smartline, Manugraph "World leader in Single width machines" now takes pride in coming in league with world class manufacturers in printing machines

The Demo was attended by a group of editors from prestigious printing magazines who were really thrilled witnessing the live demo. The programme included visit to the two manufacturing facilities at Kolhapur i.e. Unit 1 & 2 spread over 33 acres land. The delegates were taken on factory round, with exclusive focus on high-end CNC set-up, CMM, and other manufacturing facilities & Assembly set-up.

Presentations were made on the technological developments at Manugraph and also prestigious projects completed. During the discussions special emphasis was laid on the range of Folders that we offer, ranging from 1:2:2, 2:2:2, 2:3:3, 1240, 1270 & commercial Folder 1:3:3 etc., which was apart from appraising them on our Print Tower options, ranging from 35K to 70K.

Mr. Sanjay Shah - Vice Chairman and Managing Director of Manugraph graced the occasion and briefed the press on the overall philosophy of Manugraph and the reason to the making of the 4X1 Smartline.
